

## Construction of a Retaining Wall for the Coaquipa School, La Paz (SDAF 0005)

## Construction of a Retaining Wall for the Coaquipa School (SDAF 0005)

### Project Description:

The *Coaquipa* school is located on a steep slope, and due to environmental conditions has suffered major damage to its foundation. The construction of a retaining wall supports the ground structure and prevents the collapse of the school, thereby improving safety and educational conditions for the 12 students and two teachers.

During a visit to *Coaquipa* on May 14th, 2007 the construction was inspected and the retaining wall formally handed over to school officials. At the request of the Community, a
