

Installation of Solar Panels at Las Cerdas School, Potosí (SDAF 0007)

Installation of Solar Panels at Las Cerdas School (SDAF 0007)

Project Description:

The community of *Las Cerdas* is remote and does not have access to electricity. The 97 students and seven teachers in particular suffered from this lack of electrical power, as they were unable to study or make lesson plans in the evenings. The solar panels provided by the SDAF have improved the educational conditions of the children in the community.

An inauguration event with USAID/Bolivia and ACDI/VOCA representatives was held in *Las Cerdas* with USAID/Bolivia on May 22, 2007.

One hundred USAID/Bolivia-branded notebooks and 2 large maps of Bolivia were handed out to the children during this inauguration.

Location	Comunidad <i>Las Cerdas</i> , Potosi
Beneficiary Organization	Simon Bolivar School
Beneficiaries	97 students
SDAF Contribution	\$4,521
Status	Completed
Completion Date	May 22, 2007
