

Provision of Fruit-Drying Tents, Cochabamba (SDAF 0019)

Provision of Fruit-Drying Tents (SDAF 0019)

Project Description:

About 50 percent of peach production is lost during harvest because impassable roads (due to the rainy season) prevent the fresh produce from reaching the Cochabamba market. Through the SDAF, solar-drying tents were installed in each of six communities. Producer committees have been established to manage the use of these facilities and the municipal government provided training in the handling of tents and dried fruit.

Location	Ayopaya Province of the Independencia Municipality, La Paz
Beneficiary Organization	Municipal Government
Beneficiaries	60 families
SDAF Contribution	\$ 3,062
Status	Completed
Completion Date	July 2008
